

To Whom It May Concern:

I have a long and successful work history within the creative arena, with over ten years of experience in web development and multimedia design. My most recent experience has been working with CNN.com as a creative designer providing ideas and design skills from front-end design, website specs and guides up to flash developing. Also within less than two years at Eyewonder, I have become one of their most valuable designers for the west coast region in the Atlanta office as well as being promoted to senior designer.

With my level of expertise and my ability to multitask within the Windows and Macintosh environment, complements my qualifications. Enclosed is a resume for your review and link to my online portfolio.

I look forward to meeting you to discuss how my skills will be of benefit to your company.

Sincerely,

Erick Franco
